

Foreign-Trade Zones

A Foreign-Trade Zone (FTZ) is a designated area within U.S. borders which promotes domestic employment and helps U.S. firms compete in the global marketplace. An FTZ is located in or near a U.S. Customs port of entry, where foreign and domestic merchandise is generally considered to be international commerce. Foreign or domestic merchandise may enter this enclave without a formal customs entry or the payment of custom duties or government excise taxes.

Foreign-Trade Zone procedures allow domestic activity involving foreign items to take place as if it were outside U.S. Customs territory. Duty-free treatment is accorded items that are re-exported and duty payment is deferred on items sold in the U.S. market, thus offsetting Customs advantages available to overseas producers who compete with producers located in the United States.

A site that has been granted zone status may not be used for zone activity until the site or a section thereof has been separately approved for FTZ activation by local U.S. Customs officials, and the zone activity remains under the supervision of Customs. A subzone is a special-purpose zone, usually at a manufacturing plant.

FTZ sites and facilities remain within the jurisdiction of local, state or federal governments or agencies.

Maryland has four Foreign-Trade Zones:

- Baltimore #74
- BWI Airport #73
- Prince George's County #63
- Washington County #255

Baltimore # 74

The City of Baltimore's Foreign-Trade Zone, FTZ #74 was established in 1982 and has been continually expanded and modified due to various requests for additional space. Zone space, originally 60,000 square feet, currently contains more than 1,254 acres at 33 sites within the City of Baltimore, Anne Arundel, Baltimore, Cecil and Harford counties.

As documented in the 2013 Annual Report, FTZ #74 has 18 operators, and serves 153 businesses employing 1,617 people. Over \$15.27 billion worth of goods were transferred to U.S. Customs' Territory in 2013 and \$389.5 million in merchandise was exported from the FTZ to international markets.

Following is a list of selected active sites within FTZ #74. For a map of the zone sites, see baltimoredevelopment.com/for-business/assistance-programs-tax-credits/foreign-trade-zone/.

Prince George's County # 63

Prince George's County's application to the U.S. Foreign-Trade Zones Board under the alternative site framework was recently approved, so now FTZ #63 is county-wide and companies can access FTZ benefits anywhere in the county. The county is near three major ports of entry: Baltimore/Washington International Thurgood Marshall Airport, the Port of Baltimore and Washington Dulles International Airport. The zone's central location in the Northeast Corridor plus its highly developed transportation network and close proximity to Washington, D.C. provide efficient overnight access to markets in the eastern United States.

Prince George's County Economic Development Corporation offers funding and direct assistance to companies locating in the county, as well as workforce development, recruitment and training services for employers.
